**LEARNING IS EVOLVING.** Leading organizations look for ways to maximize learning effectiveness by placing training and knowledge management initiatives in context with the needs of individual and group development. Learning has become the connective tissue between the organization's mission and those charged with carrying it forward. This connected Learning motivates employees and aligns their needs with organizational initiatives. Whatever your training needs, ProSidian can help. From a single course to an integrated, multi-subject training pathway; we provide resources for Training And Knowledge Management while enhancing your organization's reputation, performance, and bottom line. Learn more about our solution for Workplace Health Training: **INVEST | EMPOWER | DELIVER.**

#### Training Category

**Special Programs - Workplace Issues:** ProSidian workplace health and awareness training services offer comprehensive training programs on Occupational Safety and Health Administration (OSHA) initiatives and certifications as well as interpersonal concerns to assist with establishing an overall healthy working environment. We provide resources and information designed specifically for employers, including safety and health tools and easy-to-follow guides for specific standards. This course for private sector and government agency personnel covers the policies, procedures, and standards, as well as general industry safety and health principles. We assist and support employers and workers to work together to develop skills and put systems in place to maximize health, safety, and general well-being in the workplace.

#### Expected Training Outcome

Through ProSidian training on Workplace Health, each participant will gain an understanding/knowledge of Workplace Health topics which can be applied to their working environment. The desired outcome is the achievement of a skill by the participant that enables them to apply knowledge learned to enhance and improve workplace and worker efficiency, accomplish work tasks, understand organizational health policies, and achieve health balance.
